

NSF Scholarships in Science, Technology, Engineering, and Mathematics (S-STEM)

Department of Computer Science
College of Engineering
North Carolina Agriculture and Technology State University

What the S-STEM Scholarship Offers

Through NSF S-STEM scholarship, North Carolina Agriculture and Technology State University will provide grants to students to study in the field of computer science. Each scholarship recipient will complete a graduate degree in Computer Science. All participant will be fully integrated into our research programs and be associated with one of our ongoing research projects. All scholarship recipients will receive funding for up to two years.

Scholarship Benefits

The specific benefits for S-STEM scholars will be:

- A graduate student will be paid a stipend of \$8,000 per year.
- Possible tuition remission and additional support.

Requirements and Eligibility

The eligibility criteria are:

A United States citizen, permanent resident, nationals, or refugees

- A full-time graduate student within two years of graduation at North Carolina A&T State University with a Master's degree in Computer Science.
- A minimum grade point average of 3.0 on a 4.0 scale
- Documented financial need
