Good News!

Google Apps for Education (GAFE) will soon be available for all students at North Carolina A&T State University. The Division of Information Technology, the Division of Student Affairs, and your Student Government Association began implementation of GAFE on September 4, 2012 with a select group of continuing students from the School of Education (SOE). The SOE students are the first continuing students to begin using Google Apps during the Fall 2012 semester.

All NCAT continuing students will experience a richly featured email platform using Google Apps by October. This means that a student's old email account (*username@ncat.edu*) will be replaced with a new Gmail account (*username@aggies.ncat.edu*). NCAT continuing students will receive Gmail, Calendaring, Contacts, Instant Messaging (IM), Voice & Video Chat, Voice Mail, Google Docs and Google Sites. To access Gmail, go to the [NCAT home page](#), click on Quick Links, and then click [Google Mail](#). Students can use their existing usernames and default passwords (*1st 4 letters of username and last 4 digits of Banner ID*) to log into their Gmail account.

Continuing students have thru November 9th to transfer emails that they want to keep from their old email account to their new Gmail account. All student emails that are not migrated by November 9th will be purged and no longer available. For questions about how to transfer data or to get help with Google Apps for Education products, please go to:

How to Migrate Email From Your Current Email to Your Gmail Account

<https://support.google.com/mail/bin/answer.py?hl=en&answer=21288>

We are happy to provide all our students with what they have been asking for, Google Apps for Education, a suite of advanced collaboration tools which are compatible with Smartphones and other mobile devices that enhance communication and increase the productivity of our students.

Best Regards,
Division of Information Technology
