

Read Me Safety Systems

This unit is designed for the **first grade**. The package consists of:

1. System Overhead Transparency Master that help students learn the words - system, parts, and together.
 2. Safety Overhead Transparency Master that helps students learn the words - safety and careful.
 3. Journal 1 is a worksheet that helps students practice recognizing/writing the words in the System Overhead
 4. Journal 2 is a worksheet that helps students practice recognizing/writing the words in the Safety Overhead
 5. The Safety Systems Reader is to be printed out and then copied front to back, folded in half and stapled like a small book. That is why the pages are arranged in the funny order.
 6. Bedroom Safety Design is a worksheet on which students draw the parts of their bedroom safety system so others see how the parts work together as a system.
- ? Students then build models of their bedrooms using shoe boxes and other supplies.**
7. Journal 3 is a worksheet that prompts students to write what the parts of their bedroom safety system are.

This multiple evidence should provide you with enough information to judge whether or not your students have achieved Benchmark B of Standard 2 in the *Standards for Technological Literacy*.
