*Suggested reading:*

R.W. Sebesta, *Programming the World Wide Web*, Addison Wesley, 2002.

*Description:* This course introduces students to the Internet and the World Wide Web. Topics include HTML, CSS, and client- and server-side scripting (the JavaScript and Perl languages), and CGI.

*Grading*

*Programming Assignments:* 30 % of the course grade

*3 Quizzes:* 12% of the course grade (divided evenly)

These will be brief, c. 20 min., and will test your grasp of the fundamentals just covered.

*2 Exams:* 30 % of the course grade (divided evenly)

*Final:* 28 % of the course grade

*Exam Policies*

Exams and quizzes are generally open-book. Make-up exams will be allowed only if you arrange with me before the exam.

*Late Submission of Assignments*

10% per class period will be deducted for assignments submitted after they are due.

*Grade Ranges*

A: 85-100% B: 73-84% C: 60-72% D: 50-59% F: 0-49%

**Measurable Outcomes**

- Code HTML, CSS, JavaScript and Perl.
- Use dynamic HTML, CGI, and ODBC.
- Understand client-server computing in a Web context as well as the HTTP protocol.

On completing this course, the student should be able to produce professional Web pages and basic Web sites. The course does not cover Web design from an aesthetic or ergonomic angle, systems that facilitate Web site construction, or languages that simplify server-side scripting. The focus is on standards and scripting languages.

**Cheating:** Cheating covers any case in which a student has received unauthorized aid in his/her performance that contributes to a course grade or submits material contributing to a course grade with the intent to deceive the instructor or grader. If the unauthorized aid includes help from another student, then that student is considered to have cheated as well.

If a student cheats on lab work or a homework assignment, then he/she will receive a grade of zero (a grade of F) for that item as will anyone assisting him/her in an unauthorized way. If a student cheats on an exam or final, he/she will receive a failing grade for the class. All cases of cheating will be reported to the Director of Undergraduate Studies. When a student cheats for the second or more time in any Computer Science class, he/she will receive an F in the class in which the most recent case occurred and will be referred to the University authorities for disciplinary action.
