

Research Apprenticeship Program (RAP) for High School Students

THE PROGRAM

RAP is a four-week residential summer program for current high school juniors and seniors (ages 16-18). Its main objective is to stimulate interest in agriscience professions, including: **biological engineering/ biotechnology/ business and economics/ child development/ fashion and apparel/ food product development/ horticulture/ landscape architecture/ nutrition/ teaching/ veterinary science**, and many more.

Registration deadline: 2/2/2018

Program Date: 6/17 - 7/13/2018

Through the program, students will:

- Earn while learning for the summer.
- Gain first-hand experience in research conducted under the direction of the CAES research scientists.
- Conduct research projects ranging from landscape architecture and pesticide studies, biotechnology, horticulture and animal sciences to air quality, food and nutrition and international trade.
- Gain exposure to a number of structured activities including field trips, workshops and laboratory demonstrations, and instruction in computer applications, technical and scientific writing and public speaking.
