Strategic Plan Fiscal Year 2022-2023

Purpose: The CDL is a high-quality early childhood education facility housed organizationally in the Department of Family and Consumer Sciences on the campus of North Carolina Agricultural and Technical State University (N.C A&T). The CDL has existed for over sixty years as a teaching, research, and service laboratory for university students explicitly majoring in Child Development, Early Education, and Family Studies, faculty researchers, and community partners. Primarily, the CDL provides a learning and demonstration center for students (undergraduate and graduate) to observe, practice, and reflect on the methods and theories taught in their academic programs to educate, service, and support diverse young children and their families. Students in various majors on campus utilize the CDL, including special education, physical education, elementary education, drama/theatre, psychology, speech pathology, social work, nutrition science, and nursing. It provides hands-on learning experiences for over 200 university students and, as a result, contributes to a body of literature, teaching practices, and the lives of children and their families.

The children and families served at the CDL are observed and participate in various educational experiences and course requirements related to the curriculum and classroom assignments instructed by University Instructors. Children and families are also vital components of the research structure and are asked to participate in research and educational activities. The CDL adheres to the guidelines and restrictions of State, Federal, and Institutional compliance related to human subject research. As a result of compliance with these guidelines, no research conducted jeopardizes any child or adult in the CDL.

The goals and objectives of the Child Development Laboratory are twofold:

1. To provide a quality early childhood learning program for children and families
2. To offer the following for our university students and faculty:
   - **Teaching:** Educators employed at the CDL will teach University students the fundamental practices for providing a learning environment that is conducive to how young children learn;
   - **Service:** Educators and University students assigned to the CDL will demonstrate and provide hands-on methods for serving the needs and interests of young children; and
   - **Research:** Educators, parents, and children assist in the research component that promotes the welfare of children in our nation.

Mission: The CDL at N.C. A&T in the Department of Family and Consumer Sciences is a nurturing, creative, and engaging learning environment for preschool children, University students, faculty, staff, and the community. It offers a program that fosters self-reliance and inspires life-long learners. Families are encouraged to become actively engaged in the program.

Vision: The vision for the CDL at N.C. A&T is for each child to enable every child to develop a curiosity of learning, discover interests, and grow in the developmental domains of physical, cognitive, social-emotional, language, and learning approaches.

Strategic Planning Goals:

1. Expand the Child Development Laboratory to serve more children and families from the university and surrounding communities.
2. Obtain NAEYC Accreditation to ensure the high standards and quality of best practices for children, families, and staff are provided.

3. Increase staff salaries and professional development opportunities.

4. Accept electronic payments online for tuition and activity fees as a convenience for families.

5. Enhance our outdoor environment by purchasing new equipment and materials for children to have more access to learning and development.

**Detailed Strategic Goals:**

**Goal 1: Expand the Child Development Laboratory to serve more children and families from the university and surrounding communities.**

Steps:
- Assess the current indoor and outdoor space and prioritize needed types of space to align with professional standards and curriculum development.
- Address long-term facility needs and corresponding funding opportunities.
- Develop a written proposal to the Department Chair and Dean describing expansion plans.

Resources Needed:
- Division of Child Development and Early Education Child Care Rules
- Funding support
- Space
- Teachers and Staff
- Building
- Materials

Goal Completion Date
- Revised proposal submitted June 2022.
- Spacing meeting held on September 15, 2022.
- Goal completion – Announced that the CDL is included in Phase 2 of the University's expansion plan. We will continue to advocate for more space. A meeting was held with the City of Greensboro for spacing, and awaiting feedback.

**Goal 2: Obtain NAEYC Accreditation to ensure the high standards and quality of best practices for children, families, and staff are provided.**

Steps:
- Prepare and compile documents in the program and classroom portfolios.
- Manage center information in the NAEYC Accreditation portal.

Resources Needed:
- Online access
- Information from center and staff policies
- Planning time for teachers to prepare classroom portfolios
Goal Completion Date
- Goal completion – September 2022
- A site visit was held in September 2022
- Results were received in December 2022

**Goal 3: Increase equitable staff salaries and professional development opportunities.**

**Steps:**
- Increase tuition.
- Seek acceptance for NC Pre-K or USDA Food Program (CACFP)
- Expand the center to serve more children.
- Compare salaries to other UNC System schools.

**Resources Needed:**
- Performance evaluations
- Professional development plans
- Expansion proposal
- Grants
- UNC system salary database

Goal Completion Date
- June 2023

**Goal 4: Accept electronic payments online for tuition and activity fees as a convenience for families.**

**Steps:**
- Purchase ProCare Software
- Consult with the cashier’s office and Information Technology (IT).
- Training on electronic payments

**Resources Needed:**
- Online access
- ACH authorization

Goal Completion Date
- June 2023

**Goal 5: Enhance our outdoor environment by purchasing new equipment and materials for children to have more access to learning and development.**

**Steps:**
- Collaborate with early childhood specialists on classroom and playground environments.
- Research childcare rules to ensure adequate space is being met.
- Search for vendors to develop a blueprint.
- Provide playground inspections.
• Advocate for childcare center licensing revisions to be adopted.
• Order furniture and materials.

Resources Needed:
• Playground catalogs
• Online access
• Childcare access
• Needs assessment

Goal Completion Date
• June 2023
Greetings CDL Faculty, Staff, Family, and Friends,

We are concluding yet another successful academic school year. By reading this report, you will learn about the remarkable program operation, professional achievements, innovative teaching, our community-based collaborations and partnerships, family engagement, and much more. Beyond these milestones, you will see compassionate childcare community leaders and advocates stepping up to serve as a treatment for the children and families that we serve.

Guided by our 2022-2023 fiscal year theme: **“The Sky is the Limit”**, we have truly reached the limit that has been set by the goals we have accomplished. As we begin to test our resolve from the unprecedented global pandemic of COVID-19, we have learned a lot, and are becoming even more innovative and resilient in our special work that we do for children, families, and our community partners.

The highlight of our fiscal year was achieving national accreditation by the National Association for the Education of Young Children. After obtaining this achievement, we are listed as the eighth early childhood program in Guilford County to receive this honor. The entire accreditation process took nearly two years including a featured a written self-study, an application, and the site visit. Of the two classrooms chosen for evaluation, the younger classroom scored a 99% and the program scored a 96.77%. This award enhances what we already do to provide a positive, energetic work environment. We pride ourselves on the hard work and dedication, and it’s wonderful to see it all pay off.

Our early childhood program continues to thrive as we maintained a perfect compliance record for the sixth consecutive year with the Division of Child Development and Early Education, The Department of Public Health, The City of Greensboro Fire Department, and the North Carolina Agricultural and Technical State University Environmental Health and Safety Division.

What the CDL does is essential to the vulnerable communities that we serve. We did not stop during the pandemic; we kept on going. We worked even harder, helping our children and their families safely, no matter what! In partnership with you, we do this important work well. For this we thank you and show our appreciation for your generous support!

With immense gratitude and essence of Aggie Pride,

Jawan M. Burwell
Jawan M. Burwell, Ed.D., CFLE
Director
Program Structure

The Creative Curriculum provides the framework for learning at the Child Development Laboratory. This curriculum emphasizes the CDL’s philosophy on children learning, growing, and developing. It is based on the theories of Maslow, Erikson, Smilansky, Vygotsky, Gardner, and Montessori, and new information on brain development and resiliency is included. This philosophy is characterized and embraced in The Creative Curriculum and Foundations: Early Learning Standards for North Carolina Preschoolers and Strategies for Guiding Their Success. The components of the curriculum include: 1) establishing a good learning environment, 2) assisting children in functioning well in the classroom, and 3) assessing children.

Developmental Theory

Children's experiences and the skills and characteristics they develop during preschool are critically important to their success later in school. We believe, and research supports, that what children learn between birth and when they start kindergarten lays the foundation for their learning and development. Because of the diverse backgrounds, cultural and family experiences, growth, and development of young children, several theorists’ applications are incorporated into The Creative Curriculum used at the CDL. The teaching approaches to learning are:

- Child-initiated learning
- Teacher-directed learning
- Interacting with children to promote learning
- Adapting instruction to all children
- Working with groups of children, large and small
- Promoting learning in interest areas

The developmental stages are defined as follows:

1. Emotional and Social Development
   - Developing a sense of self; developing a sense of self with others
2. Health and Physical Development
   - Self-Care, Safety Awareness, Motor Skills, Physical Health, and Growth
3. Language Development and Communication
   - Receptive Language, Expressive Language, Foundations for Reading, Foundations for Writing
4. Cognitive Development
   - Mathematical thinking and expression, Scientific Thinking and Invention, Social Connections, Creative Expression

Program Enhancements

The Parent Handbook was revised to modify the policy of returning children's siblings receiving an automatic entry for enrollment, in addition to meeting the updated changes in policies and practices to correlate with changes in the childcare laws and regulations, the CDL, and NAEYC accreditation standards. We currently have an Operational and Policy Handbook for all staff members. This handbook was revised to include the new policies to meet the standards for NAEYC accreditation standards. Ten (10) Teacher Workdays and two (2) Early Release Days were built into the CDL's operational calendar to allow teachers to attend professional development training, provide time to work in their classrooms,
modify learning spaces that match children's new developmental needs, and plan extended learning experiences for children and their families. Four (4) Wellness Days were also built into the calendar to promote self-care and mental health awareness. The teachers also have designated planning time to meet and discuss curriculum planning. The concept of team teaching was continued. This allowed both teachers to perform at an optimum level in the classrooms. The COVID-19 Response Plan continued to be implemented, providing health and safety protocols throughout the school year. Children and staff were tested twice a week. University students completed virtual field experiences as the policy prohibited students from being in the building. In the Spring semester, students were allowed to complete in-person field experiences while following the COVID-19 guidelines and protocols. The mask mandate was lifted on April 20, 2023.

The Dial-4 Screening tool was used to screen all children. This initial screening was completed within the first six weeks of school to facilitate teachers' planning, implementation, and evaluation of the classroom environment and incorporate individualized learning experiences. There were eighteen (15) children transitioning out of the CDL.

Dr. Jawan Burwell revised and updated the Emergency Preparedness Response Plan (EPRP) to reflect the current staff and responsibilities and the Division of Child Development and Early Education guidelines. The risk management plan consists of information such as:

- Staff/Child Hand washing
- Sanitation Requirements
- Food Allergy Procedures
- Administering Medication
- Incident Reporting
- Family Involvement
- Evacuations
- Drills (Fire, Hurricane, Tornado, and Lockdown)

At the end of each Emergency Preparedness/Risk Management book is a copy of each form required to comply with The Division of Child Development and Early Education and CDL procedures. This year the updated EPRP was completed and submitted online at the Child Care Facility EPRP website.

Creative Expression

**Enrollment**

Two hundred twenty-eight (228) application packets of interest were mailed out to recruit new families for the 2023-2024 academic year. One hundred two (102) applications were returned to be considered for the lottery selection. The selection of returning children created 15 vacant spaces for new enrollment: 14 slots for the younger class and one slot for the older classroom. Three (3) children in the older classroom will be returning, and 14 children in the younger class will be moving up to the older classroom. Two (2) children enrolled in the younger classroom will be returning.

During the 2022-2023 academic school year, the CDL served a total of thirty-four (34) children between the ages of two-and-a-half (2½) and five (5) years old. The children were divided into two classrooms: one class of 16 (two-and-a-half (2½) and three (3) years old) and the other class of 18 (four (4) and five (5) years old). The CDL served children of the University faculty, staff, students, and the Triad community. A balanced population is sought according to the child's age, gender, and economic demographics.
Two-and-a-half and three-year-olds (Mrs. Baskerville (Retired December 2022) and Ms. Jones)

- 6 Boys  Black/African American
- 2 Boys  Bi-racial
- 1 Girl  Bi-racial
- 9 Girls Black/African American

Four-and five-year-olds (Mrs. Black and Mrs. Sellars)

- 7 Boys  Black/African American
- 2 Boys  Bi-racial
- 1 Girl  Bi-racial
- 7 Girls Black/African American
- 1 Girl White/Caucasian

The CDL supports the enactment of Public Law 94-142 which integrates students with exceptionalities into regular classrooms. Specialists (i.e., speech, occupational, health, developmental, and behavioral) worked with the CDL teachers and Administration to observe and strengthen two identified children learning at the CDL. Two children were observed in a naturalistic environment or removed from the classroom for specialized one-on-one skill-building experiences. There were also children with allergies, food preferences (religious and non-religious), and nutrition opt-outs.

- In the 2 ½ to 3-year-old classroom, there were:
  - Two (2) children with Nutrition Opt Out
  - Four (4) children with a no-milk preference

- In the 4 to 5-year-old classroom, there were:
  - Four (4) children with Asthma
  - Two (2) children with Eczema
  - One (1) child allergic to Grass, Pollen, Cockroaches, Cats, Feathers
  - Two (2) children with Nutrition Opt Out
  - Seven (7) children with food allergies or special dietary needs
    - One (1) child allergic to Bananas and Soy; No milk, parental preference
    - One (1) child allergic to Shellfish and Tree Nuts
    - One (1) child allergic to Tree Nuts; No milk, parental preference
    - Four (4) children with no milk, parental preference

Staff

Dr. Jawan Burwell is the Director and holds a Doctor of Education in Early Childhood Education with a Level 3 Administration Credential. The administrative support specialist position is vacant with anticipation to fill over the summer. Two professional teachers in each classroom hold a bachelor's degree in Child Development, Early Childhood Education, or a related field. In the 2 ½ to 3 years old classroom, Ms. Charryse Jones has a bachelor's degree in Early Childhood Education, and Mrs. LaDonnell Baskerville has a bachelor's degree in Early Childhood Education. Mrs. Baskerville retired from her duties as a classroom teacher effective December 31, 2022. Ms. Amaris Augustus, Senior student intern in the Child Development and Family Studies program area at N.C. A&T served in the capacity of a substitute for the Spring semester. It is anticipated that a new teacher with a bachelor's degree in Child Development, Early Education, or a related field will be hired over the summer. In the 4 to 5 years old class, Mrs. Monica Sellars has a bachelor's degree in Human Development Early Education and Family Studies, and Mrs. Pétrolá Black has a bachelor's degree in Elementary Education.
The CDL teachers and staff are required to obtain a minimum of 5 clock hours, as described by the Division of Child Development and Early Education. A subscription was renewed to assist the teachers and administrative staff with in-service training (Child Care Education Institute). It is CDL policy that the teachers and staff complete two (2) trainings per month relative to child development, which exceeds the minimum required hours by the Division of Child Development. The entire CDL staff has a current and valid CPR and First Aid certification. Effective July 22, 2022, due to the adoption of House Bill 103, DCDEEE qualification letters are now valid for five years. All CDL staff added two years to make current letters valid for five years.

**Professional Achievements**

Dr. Jawan Burwell, Director, presented his research on Father Engagement at one (1) local, one (1) state, and two (2) national conferences and received the College of Agriculture and Environmental Sciences Leadership Award. The CDL also earned a prestigious national accreditation by the National Association for the Education of Young Children. The CDL became the eighth center in Guilford County to earn this accreditation. This is the highest rating that can be received from the national organization and will help us expand the curriculum to provide the highest quality of early care and education for children and their families. The accreditation process took nearly two years, featuring a written self-study, an application, and a site visit. Of the two classrooms chosen for evaluation, the younger classroom scored a 99%, and the program scored a 96.77%.

**State Inspections**

Camille Davis, licensing consultant, completed the unannounced annual compliance visit on September 7, 2022. Free-choice center activities, outside play, group time, and handwashing/bathroom procedures were observed. After a full assessment, no violations were found, which resulted in 100% compliance with all childcare requirements through the Division of Child Development and Early Education. On 5/18/23, a routine unannounced visit was completed. Outdoor play and teacher interaction was observed. After a partial assessment, no violations were found, which resulted in 100% compliance with all childcare requirements through the Division of Child Development and Early Education. The CDL is due for our star-rated assessment in March 2023; however, the deadline has been extended until December 2023 per the licensing consultant. A visit prior to opening fully in August will occur to finalize star rating details.

Our fire inspection visit was completed on November 15, 2022, and no violations were received.

Our Sanitation inspection was conducted on October 12, 2022, and the second visit was conducted on April 25, 2022. A superior rating was earned from the first visit, and no demerits were found. A superior rating was earned from the second visit, and four (4) demerits were found. The demerits were earned due to inaccurate water temperatures in the classrooms, bathrooms, and kitchen area. A work order to fix water temperatures was opened and has been corrected.

**Innovative: Teaching**

The teaching staff is embracing the concepts of the *Creative Curriculum*. We continue to incorporate and implement the *Teaching Strategies Gold online* assessment system. Weekly themes were added, and the classroom areas were transformed into a Library, Aquarium, Zoo, and Pet Shop. Materials are constantly being added to complement and enhance the learning objectives. The interests of the children are considered and integrated into the planning to meet each individualized need of the children. The teachers plan extended learning experiences outside of the classroom environments. The teachers continue incorporating the Pyramid Model and Conscious Discipline techniques into the classroom. They expand
their Activity Plans to include individual goals, more physical movement with music, and gardening activities. We continue implementing the Healthy Me/Healthy We in the curriculum.

This school year has been an excellent year for the Aggie Superheroes! The children have experienced much success during this academic year 2022-23. We’ve continued to use the Creative Curriculum, the Teaching Strategies Gold Online, and the Healthy Me/Healthy We Curriculum. Conscious Discipline and the Pyramid Model were used to help the children to use their words with their friends to resolve conflicts with the Time Machine. The children enjoyed the following themes: Incredible Me, Caring and Sharing, Insects, and Healthy Living. In December, the Child Development Laboratory was transformed into the Polar Express for our winter extravaganza. The children learned a lot about the genre of music. Our families have been updated through Aggie Superheroes Newsletters, PTO Meetings, and the ProCare App. Our families have been very supportive and encouraging at the Child Development Laboratory. We thank you and appreciate all they do here at the CDL. As teachers in the younger classroom, it has been a pleasure to see the children learning and continuing to grow and develop. We want to thank all Aggie Superhero families for their support sincerely. This has been yet another fantastic year!

Academic Development Report

This report will discuss the growth and development of the children in the two/three-year-old classroom served during the 2022-2023 academic school year. Information has been collected through a prescreening tool known as the Dial-4 screening. Also, ongoing assessments are completed using the Creative Curriculum at the beginning of the year. This curriculum includes Teaching Strategies Gold Assessment and Evaluation tools used throughout the year. Within this curriculum, nine content areas are viewed and used as a guide to scaffolding a child's learning. Instructional strategies also supported children's paths to the next level. Additionally, anecdotal records were kept of the child's day-to-day interaction with other children and teachers and documentation through photographs. Teachers encourage, support, and assist the children through the development levels 1 through 7.
Note: At the beginning of the year, it is appropriate for a student's skills and abilities to fall below widely held expectations for their age or class/grade because he may not have received instruction for that level.

Social/Emotional Development

Social-emotional development includes the child's experience, expression, and management of emotions and the ability to establish positive and rewarding relationships with others. According to the report, the children met the following goals and objectives with consistent growth and development of a typical child. Conscious Discipline techniques were used to govern the child's behavior and strengthen their abilities to recognize their feelings. As a result, 62.5% of children began below the widely held expectations in the Fall, 31.25% met them, and 6.25% exceeded them in the Spring. With strong, consistent, determined efforts through Conscious Discipline techniques, particularly for children at this young age, the children successfully met this objective.

Physical Development: Gross Motor

Gross (or large) motor skills involve the larger muscles, including the arms and legs, walking, running, balancing, and coordination. At the CDL, we promote a balance of physical activities through movement and music. We implement "Healthy Me, Healthy We" experiences that promote imaginative play, provide outdoor experiences, and encourage healthy eating habits. We also utilized tricycles, parachutes, and other large Fine (or small) motor skills involving the smaller muscles in the fingers, toes, and eyes. The actions that require fine motor skills tend to be more intricate, such as drawing, writing, grasping objects, throwing, and catching. The interest areas in the classroom allow the children to continuously use their hands to create and manipulate things and work on their eye-hand coordination. This is accomplished by controlling their fine muscles to perform tasks such as using a fork to eat, interlocking blocks, stringing beads, and cutting with scissors.

With more physical development, the children moved from 75% below the widely held expectations in the Fall to 25% meeting the expectation and 56.25% exceeding in the Spring of 2023. Children were able to meet this objective with consistency with growth increase. The data collected supports growth and development among the children by the end of the year.

Language Development

Early language development is how a child begins to understand language and communicate. Language is essential in establishing and keeping a good relationship with children and adults. The children are continuously encouraged to use their words to express their needs verbally and want and listen when others speak. With listening and speaking, comes reading and writing. Using age-appropriate practices, the children are encouraged to speak their thoughts as we dictate what they say. In the Fall of 2022, 62.5% of the children began below the widely held expectations, and 37.5% met the expectations, with 43.75% exceeding by the end of Spring 2023. The children were successful due to the opportunities to demonstrate their abilities to listen, understand, and communicate language by the end of the year.

Cognitive Development

Cognitive development is the construction of thought processes, including remembering, problem-solving, and decision-making. This section has documented how children think, see the world through their eyes, and use what they learn. Using this Developmental Continuum gives a representation of the children's thought processes. It also expands their minds at many different levels at different periods. Cognitively young children demonstrate positive approaches to learning, remembering and connecting
experiences, and using classification skills. In Fall 2022, the children began at 62.5% below the widely held expectations. In the Spring of 2023, 50% met expectations, and 43.75% of the children exceeded widely held expectations. By the end of the year, 6.25% of children were below the wildly held expectations.

**Literacy**

Early literacy is everything a child learns and knows about reading and writing before they can read and write. For children to develop healthy dispositions toward reading and literacy, experiences in the early years must engage children actively in the process of learning. Children can become aware of systematic patterns of sounds, identify and name letters, use and appreciate books, retell stories, and write. According to the data collected, at the beginning of the school year of fall 2022, 43.75% of children were below the widely held expectations, 37.5% met the expectations by the end of Spring 2023, and 62.5% exceeded the expectations. By the end of the year, there were 0% children below the widely held expectations.

**Mathematics**

Mathematics is appropriately connected to a child's world. Appropriate mathematical experiences challenge young children to explore ideas related to patterns, shapes, numbers, and space. Early development of number concepts is critical in developing positive attitudes about mathematics. Unique methods and activities assisted children in developing early numeracy skills. 56.25% of the children began the school year below the widely held expectations, with 50% meeting and 50% exceeding the expectations by the end of spring 2023.

In conclusion, through combined play, social interaction, communication, and abundant hands-on experiences, the children could meet developmental milestones through custom-made practices to meet their individual needs. These are essential to the growth of our children. Early years are the learning years, and effective instruction in the early years will significantly impact children's literacy development, and the child develops holistically.

Here at the Child Development Laboratory, we strive to provide our children with a nurturing, creative, engaging environment where we foster self-reliance and inspire life-long learners.

Younger Classroom Teachers,

Ms. Charryse Jones & Ms. LaDonnell Baskerville (Retired effective December 2022).
4 to 5-Year-Old Classroom Summary

Month | Lesson for the Month
---|---
August | Welcome
September | Back to School
October | Autumn Season
November | Harvest/Thankfulness
December | Musical Diversity/Polar Express
January | Winter Season
February | Be Active/Heart Healthy
March | Spring
April | Our World
May | Summertime
June | Summer/Bridging Over

The year of The Sky is the Limit started with eighteen (18) children enrolled in the Aggie Colorful Creators 4- and 5-year classroom. Using the Creative Curriculum, each child moved developmentally at their own pace. Themes were chosen by the teachers and children that would enhance each child's growth and development. The children enjoyed themes like Back to School, Harvest/Thankfulness, Musical Diversity/Polar Express, and Our World.

The teachers used Conscious Discipline in the classroom to show children that we all can work together to reach a common goal. The children learned to work together by using their expressive language and positive attitudes when conflicts would arise between friends during our school day.

Our Busy Aggie Colorful Creator weekly letter and PTO monthly meetings kept parents abreast of school day activities. We had three (3) Parent Conferences this school year. Our Parent Bulletin Board, located outside the classroom, included a menu of meals, lesson plans, and daily activities. Parents were encouraged to volunteer during the school year or send information on themes we studied.

The children in our class have grown and developed in many ways and will be a great addition to Guilford County School system next year.

Academic/Development Report

The following summary will discuss the growth and development of the children in the four/five-year-old classroom served during the 2022-2023 academic school year. Information has been collected using the Dial-4, a prescreening tool, at the beginning of the year and ongoing assessments using the Creative Curriculum: Teaching Strategies Gold assessment and evaluation tools used throughout the year. We use a Developmental Continuum that assesses the children's progress at various times during the end with level 8, which is the desired level of competency.
Social/Emotional Development

Three goals: Regulates own emotions and behaviors, establish and sustain positive relationships and participate cooperatively and constructively in group situations

Social/emotional development during preschool promotes socialization, the process by which children learn values and behaviors others accept. The summary shows that the children are socially and emotionally ready for preschool. They are confident, friendly, and can develop good peer relationships. Children can concentrate and persist in challenging tasks. The children were able to communicate their feelings as well as become self-regulators.

In the Fall of 2022, 55.56% of children began below the widely held expectations, 33.33% met expectations, and 11.11% exceeded expectations. During Winter 2023, 50% of the children were meeting expectations, and 50% were exceeding expectations. During the Spring of 2023, 100% of the children exceeded expectations; therefore, they could communicate their feelings and develop good relationships with their peers.

Physical Development

Two goals: Gross and Fine motor

Physical development includes the child's gross motor skills (large muscle) and fine motor skills (small muscle). Brain research has shown that physical development awakens the brain. Physical development is required in early childhood classrooms and sometimes happens automatically. The children could move from basic skills to more advanced physical development. Children at this age mastered most of their physical skills through play. The benefits of promoting physical development are successful academic achievement, good general health, higher self-esteem, stress management, and social development.

In Fall 2022, 61.11% of the children began below the widely held expectations, and 38.89% were meeting expectations. During the Winter of 2023, 88.89% of the children were meeting, and 11% of the children were exceeding expectations. During Spring 2023, 22.22% of the children were meeting expectations, and 77.78% of the children were exceeding expectations.

Language Development

Three goals: Listen to and understand increasingly complex language, use language to express thoughts and needs, and Uses appropriate conversational and other communication skills

Children develop independence by using language and reading. Language development includes understanding and communicating through words, spoken and written, and those words represent objects and ideas. When children reach preschool, their ability to communicate thoughts and feeling through spoken language is important to them. Language becomes the principal tool for establishing and maintaining relationships with adults and other children.

In the Fall of 2022, 50% of the children began below the widely held expectations, 44.44% met expectations, and 5.56 % exceeded expectations. During the Winter of 2023, 55.56% of the children met expectations, and 44.44% exceeded expectations. During Spring 2023, 11.11% of the children met expectations, and 88.89% exceeded expectations.
Cognitive Development

Three goals: Learning and problem solving, thinking logically, representing, and thinking symbolically

Cognitive development refers to the mind and how it works, how children think, see their world, and use what they learn from the world around them. The Developmental Continuum addresses the children's thought processes and how their minds expand at different levels and periods.

Preschoolers use their imaginations and are creative in their thinking. The ability to take on another's perspective leads them into friendships where they can share feelings and experiences. Children have many different learning styles, and the teachers and environment must provide different activities to promote their learning styles. The Developmental Continuum shows us where the children are, how to assess and evaluate them, and how to enhance their thinking skills.

In Fall 2022, 61.11% of the children began below the widely held expectations, and 38.89% were meeting expectations. By the Winter of 2023, 11.11% began below the widely held expectations, 72.22% of the children met expectations, and 16.67% exceeded expectations. By the Spring of 2023, 27.78% were meeting expectations, and 72.22% of the children exceeded expectations. The learning environment is literacy and numerically enriched, thus building upon what the children already know.

Literacy

Five goals: Demonstrates phonological awareness, demonstrates knowledge of the alphabet, demonstrates knowledge of print and its uses, comprehends and responds to books and other texts, and demonstrates emergent writing skills.

In Fall 2022, 16.67% of the children began below the widely held expectations, 72.22% were meeting expectations, and 11.11% exceeded expectations. By Winter 2023, 72.22% of the children met expectations, and 27.78% exceeded expectations. By the Spring of 2023, 11.11% of the children met expectations, and 89.89% exceeded expectations.

Mathematics

Four goals: Uses number concepts and operations, explores, and describes spatial relationships, compares and measures, demonstrates knowledge of patterns

In the Fall of 2022, 44.44% of the children began below the widely held expectations, 44.44% met expectations, and 11.11% exceeded expectations. In the Winter of 2023, 66.67% of the children met expectations, and 33.33% exceeded expectations. In the Spring of 2023, 100% of all children exceeded expectations.

It has been a joy to watch the children grow and develop, moving from one level to the next individually and as a class. We look forward to another momentous year serving children at the Child Development Lab. The children are leaving ready and prepared for the Guilford County School System.

Mrs. Petrola Black & Mrs. Monica Sellars

Older Classroom Teachers,
Family Engagement

Several opportunities were available for families to stay actively involved in their child's learning. The Parent Teacher Organization (PTO) held seven (7) meetings this year via Zoom to discuss, plan, and implement activities and collaborative efforts between the Child Development Laboratory families and staff. This year, the PTO President, Mrs. LaDonia Alford-Jefferies, led the meetings. The president met with the Director before the PTO meetings to discuss the agenda. Participation from PTO families averaged 25 out of 34, along with the support and information shared by the CDL Staff. The teachers held three (3) parent conferences via Zoom this year to share information about the classrooms and individual child's progress and to gain parents' input into the curriculum.

The families were involved in various activities throughout the year. Families participated in three (3) community service projects, including Winter Wishes, Aggie Source Poor Panty Collection, and Aggie Rack Clothing Collection. The families also participated in the Homecoming Tailgate and Parade, Fall Festival, Trunk or Treat, Winter Celebration, Community Helpers Week, Week of the Young Child, Teacher Appreciation Week, Bridging Over, and a host of field trips to chaperone.

Special Events

During the 2022 - 2023 school year, the Child Development Laboratory held many special events. They included the following:

- The children and staff celebrated national college colors day. We wore our blue and gold to represent N.C. A&T.

- We celebrated Homecoming with a fun spirit week that included: a performance from Blue and Gold Marching Machine Drumline with a special visit from Chancellor Harold Martin, Pajama and Movie Day, a tour of the Student Center, Costume Day, Trunk or Treat, and the Homecoming parade.

- We got to tour the university art gallery, learn about the A&T 4, and watch a puppet show from Dr. Hooker's visual art students.

- We had our annual fall festival. We had food, drinks, games, music, face painting, caricature drawing, and a magician.

- We received recognition for achieving national accreditation from the National Association for the Education of Young Children.

- We celebrated our winter celebration with the theme of the Polar Express.

- We supported the NC A&T Office of Civic Leadership and Engagement and the NC A&T Aggie Source to provide food and personal care for North Carolina A&T State University students.

- We collaborated with Black Moms of the Triad to provide winter wishes to 63 families.

- We participated in an African American History lesson with the N.C. A&T Writing Center. The children colored pictures of famous African Americans, and the writing center bound the book together for each child to get one.
• The Office of Alumni Relations came to read the book "Sit In" to our children and provided them with their own copy of the book.

• We celebrated community helpers, and Sheriff Danny Rogers and his team came to talk to the children about how they keep the community safe. We also had parents of the CDL come to speak to the children about their careers.

• We celebrated NAEYC's Week of the Young Child. We had visitors each day to participate in Music Monday, Tasty Tuesday, Work Together Wednesday, and Artsy Thursday.

• We had our family field day for all the CDL families and children.

• We received a donation of an 1891 playhouse that sits in front of our building from Dr. Dawn Murphy, the Office of Leadership and Civic Engagement, and the 2022-2023 Miss Senior.

• We took field trips to McLaurin Farms Pumpkin Patch, High Point Children's Museum, Art Quest, A&T Farm, and Greensboro Science Center.

• The Parents and Education Committee at the CDL showed the teachers a lot of love and appreciation for Teacher Appreciation Week.

• On June 2, 2023, we will be celebrating 15 children Bridging Over to Kindergarten. The theme for this year is The Sky is the Limit. After the ceremony, there will be a reception with food trucks, music, and a 360 photo booth.

**University Students**

During the 2022-2023 academic school year, the following University and community collaborative students were served in the Child Development Laboratory:

<table>

</table>

| Spring 2023  | Cooperative Experience in Diverse Settings | 27 (Only 19 started and completed) |
| FCS 221     |                                              |                      |

| FCS 321     | Child Development: Pre Early Mid Child       | 21 (Only 8 started and completed) |
|            |                                              |                      |

| Volunteers and Interns | 12 |
| Work Study            | 4  |

Total Students = 67
**High School Tours**

The following high schools toured the Child Development Laboratory during the 2022-2023 school year:

- Garner High School: 50 students
- Carver High School: 30 students
- Dudley High School: 35 students
- Eastern Randolph High School: 8 students

Total Students: 123

**Collaborations with Department and Community Agencies**

The Child Development Laboratory partnered with the following departments and agencies:

- **Catering by HarLee's Catering LLC**
  - The CDL has contracted with this agency for the daily lunches for our children.

- **SYSCO**
  - The CDL has contracted with this agency for daily snacks for the children. They also provide meals for our Homecoming and Week of the Young Child celebration.

- **Triad Bounce**
  - The CDL has contracted with this agency to provide inflatables for our Week of the Young Child Family Field Day.

- **NC A&T SU Student Health Center**
  - This health center staff conducted our COVID testing every Monday and Thursday for the children and staff.

- **Bears, Balloons, and Beyond**
  - The CDL has contracted with this agency to provide face painting, balloon art, caricature drawing, and a magician for our Fall Festival and Family Field Day.

- **Characterz Unlimited**
  - The CDL has contracted with this agency to provide mascots for our Trunk or Treat, Fall Festival, and Family Field Day events.

- **DJ Robin Davenport**
  - The CDL has contracted with this vendor to provide music and entertainment during our Fall Festival, Homecoming Tailgate, and Family Field Day.

- **Kaplan Education**
  - The CDL has contracted with this agency for early childhood materials and equipment.

- **Lakeshore Learning**
  - The CDL has contracted with this agency for early childhood materials and equipment.
• **Child Care Education Institute**  
  o The CDL has contracted with this agency to provide staff with self-paced professional development trainings and workshops.

• **ProCare Solutions**  
  o The CDL has contracted with this agency for childcare management. The software also serves as a communication tool for families and staff. It also allows teachers to assess children and document their learning and development.

• **N.C. A&T Writing Center**  
  o The CDL has collaborated with this organization on campus to provide literacy experiences related to African American History.

• **N.C. A&T Visual Arts Program**  
  o The CDL has collaborated with this organization on campus to provide different historical learning experiences about visual art.

• **N.C. A&T Office of Leadership and Civic Engagement**  
  o This organization dedicated and donated a playhouse to our children, and it sits in front of the building. It has been named the 1891 Playhouse.

• **N.C. A&T Office of Alumni Relations**  
  o This organization read the story “Sit In” and provided a copy of the book to all of the children.

• **Black Moms of the Triad**  
  o The CDL has collaborated with this organization to provide gifts and wishes to children and families during the winter holidays.

• **Aggie Source Pantry**  
  o The CDL has collaborated with this organization to collect snacks and personal care items for the university students on campus.

• **Aggie Rack**  
  o The CDL has collaborated with this organization to collect gently used business clothing for the university students on campus.

**Proposed Future Planning**

• The CDL proposed to expand to a larger facility built from the ground up to give all families an equal opportunity to become a part of our CDL family. Limited slots are available every year due to the amount of space we have. Expansion is needed for more classrooms to serve the N.C. A&T, Greensboro, and the surrounding community. The proposal was presented to the spacing committee on September 15, 2022. It was announced that the CDL is included in Phase 2 of the University's expansion plan. We will continue to advocate for more space as the need for space is crucial at the present moment. A meeting was held with the City of Greensboro for spacing, and awaiting feedback.
• The Outdoor Learning environment is still a work in progress. We aspire to renovate our outdoor space entirely to promote active living for our children. Our vision is that our outdoor learning environment becomes more natural, developmentally appropriate, and inclusive for all children.

• The CDL will propose accepting electronic tuition payments online as a convenience for families.

• The CDL will begin searching for a teacher and administrative support specialist this summer to fill the vacancies, hoping to become fully staffed.

Respectfully submitted,
Dr. Jawan M. Burwell
CDL Director
