The Master of Science in Technology Management (MSTM) program provides graduate level education for highly motivated professionals concerned with the supervision of personnel across the technical spectrum and a wide variety of complex technological systems. Graduates of this program play leadership roles involving technology innovation, development and deployment of new technologies across a broad spectrum of industries, and decision-making to improve business performance. The program also offers a Professional Science Masters (PSM) concentration on Construction Science and Management (CSM). The PSM-CSM concentration is for professionals to take leadership roles in the construction industry.
