Minor in Accounting

The minor in Accounting is offered to any student completing the courses of study listed below. Accounting is the language of business and is a discipline that is needed by every organization. The minor offers the basic knowledge and understanding of financial and managerial accounting with a supporting skill set. The Accounting Minor course sequence is a strong complement to all business majors, as well as architectural engineering and computer science, to name a few.

The Accounting Minor provides students with basic knowledge of accounting, such as financial statement preparation, financial analysis, cost volume profit analysis, and budget preparation, while also working on students’ communication, teambuilding, and leadership abilities.
