Criteria and Instructions

Students pursuing a double major must comply with the requirements of both degree programs as stated in the double degree agreement published in the [Graduate Catalog](#).

*The master's degrees may be in a different or related area.

A student must apply to and be accepted by both programs before officially beginning the double degree program. In a practical sense, this means that a student should either be accepted by both programs at the same time or be accepted to the second program by the end of the second semester in the first degree program. Double degrees will not be awarded after the curricular requirements for both programs have already been met without initial application.

See The Graduate College Catalog at <https://www.ncat.edu/tgc/graduate-catalog/index.php> to read the full policy regarding double majors.

**Note: Students must submit an approved plan of study for both programs.*
